
You are receiving a
**Random Act
of Kindness**
in memory and honor of
Connor

2008-2016

Connor loved dancing and singing, and he told the best jokes. He was an old soul who appreciated a well put-together outfit, and he complimented people when they did a good job of looking nice. He adored his older brother, Aiden, and dreamed of being a chemist. Connor began fighting cancer in 2010, when his family learned he suffered from a rare and aggressive brain tumor. He underwent treatment locally, but his cancer returned. He was enrolled in a new treatment plan available only at St. Jude Children's Research Hospital. Sadly, the treatment couldn't save his life, and Connor passed away in August 2016. He was 7 years old.

Connor loved life and he loved people even more. Even while undergoing cancer treatment, he continued to think of and wanted to do things for others. This Random Act of Kindness you have received is in that same spirit and we hope you will pass it on in Connor's memory.
